SUMMARY

Backend & Automation Engineer Intern at Slashcloud.io and Computer Science undergraduate specialising in AI-integrated automation and full-stack web development. Production experience building Node.js backends and Retrieval-Augmented Generation (RAG) pipelines for automated lead capture and AI-assisted customer follow-up. Brings a business-outcome-driven approach to engineering, shaped by a background in digital marketing and self-managed e-commerce. Currently pursuing a Bachelor's degree in Computer Science.

EDUCATION

Government College University Faisalabad <i>Bachelor of Science in Computer Science (BSCS)</i>	Faisalabad, Pakistan 2025 – Present
Nusrat Jahan College, Chenab Nagar <i>Intermediate – Computer Science (ICS)</i>	Chenab Nagar, Pakistan 2023 – 2025

EXPERIENCE

Backend & Automation Engineer Intern <i>Slashcloud.io</i>	2025 – Present Hybrid / Remote
---	-----------------------------------

- Led backend and AI automation build-out for a Canadian e-commerce client (loghomestore.ca) as part of a live engineering team at Slashcloud.io: a custom Node.js pipeline unifying three inbound lead channels (website chat via Zoho SalesIQ, contact forms, and business-inbox emails), chosen over Zapier/n8n after their webhook latency and multi-turn context handling proved insufficient.
- Engineered a Retrieval-Augmented Generation (RAG) layer over a 260-chunk, 33,500+ word Google Docs knowledge base so Grok AI-drafted follow-ups stay grounded in verified pricing, specs, and policy data, eliminating hallucinations.
- Built a Human-in-the-Loop admin dashboard with smart lead segmentation, a rich-text draft editor, real-time email alerts, and a Google Sheets feedback loop that logs approved edits to continuously improve AI tone and accuracy.

Digital Marketer & Content Creator <i>Global Homeo Hub</i>	Aug 2023 – Dec 2023 Remote
--	-------------------------------

- Produced and edited AI-powered marketing videos (InVideo AI, ElevenLabs voiceovers, Adobe Premiere Pro) and designed high-CTR YouTube thumbnails, while managing daily content publishing across Instagram, Facebook, and YouTube.

Marketplace Ads Specialist <i>Evergreen Furniture Canada</i>	Jan 2024 – Mar 2024 Remote
--	-------------------------------

- Planned and executed geo-targeted ad campaigns to attract qualified local buyers in the Montreal region, and wrote ad copy that converted inbound inquiries into confirmed buyers.

E-Commerce Entrepreneur <i>Self-Managed Online Store</i>	Ongoing Remote
--	-------------------

- Built and managed a self-run online store, generating over **USD 1K+ per month** through strategic product selection and targeted Meta Ads campaigns.
- Handled end-to-end operations including inventory management, customer service, and order fulfilment.

PROJECTS

Romic Media Agency Website | *HTML5, CSS3, JavaScript, EmailJS, GitHub Pages*

- Designed and developed romicmedia.com, a full-service digital agency website – navigation, service listings, blog, and an EmailJS contact system – resolving SEO/search-index issues and deploying it independently.

Personal Portfolio | *React 18, Vite, Tailwind CSS, Three.js (WebGL)*

- Engineered a high-performance web app at alistackdev.github.io with React 18, Vite, Tailwind CSS, and Three.js (WebGL) particle physics; GitHub Actions CI/CD auto-builds and deploys on every push.

TECHNICAL SKILLS

Web Development: React 18, Vite, Tailwind CSS, Three.js (WebGL), HTML5, CSS3, JavaScript, GitHub Actions CI/CD, Responsive Design

Backend & AI Integration: Node.js, RAG, Grok AI, Google Docs/Sheets API, Zoho SalesIQ API, Nodemailer

Marketing, Content & Tools: Meta Ads Manager, Adobe Premiere Pro, InVideo AI, ElevenLabs, Git, GitHub
