SUMMARY

Backend-focused Computer Science undergraduate specialising in AI-integrated automation and full-stack web development, with hands-on production experience building a Node.js backend and Retrieval-Augmented Generation (RAG) pipeline that automates lead capture and AI-assisted customer follow-up for a Canadian e-commerce client. Complements this technical foundation with a strong digital marketing and e-commerce background – including **PKR 10 lakh+ in monthly self-managed e-commerce sales** – giving a practical, business-outcome-driven approach to engineering work. Currently pursuing a Bachelor's degree in Computer Science.

EDUCATION

Government College University Faisalabad <i>Bachelor of Science in Computer Science (BSCS)</i>	Faisalabad, Pakistan 2025 – Present
Nusrat Jahan College, Chenab Nagar <i>Intermediate – Computer Science (ICS)</i>	Chenab Nagar, Pakistan 2023 – 2025

EXPERIENCE

Backend & AI Automation Developer <i>Freelance – Canada's Log & Wood Home Store (loghomestore.ca)</i>	2025 – Present Remote
---	--------------------------

- Built a custom Node.js backend unifying three inbound lead channels – live website chat (Zoho SalesIQ), contact forms, and direct business-inbox emails – into a single automated capture-and-follow-up pipeline, chosen over Zapier/n8n after their webhook latency and multi-turn context handling proved insufficient.
- Engineered a Retrieval-Augmented Generation (RAG) layer over a 260-chunk, 33,500+ word Google Docs knowledge base so Grok AI-drafted follow-ups stay grounded in verified pricing, specs, and policy data, eliminating hallucinations.
- Built a Human-in-the-Loop admin dashboard with smart lead segmentation, a rich-text draft editor, real-time email alerts, and a Google Sheets feedback loop that logs approved edits to continuously improve AI tone and accuracy.

Digital Marketer & Content Creator <i>Global Homeo Hub</i>	Aug 2023 – Dec 2023 Remote
--	-------------------------------

- Produced AI-powered marketing videos using InVideo AI with realistic voiceovers generated via ElevenLabs, significantly reducing content production time.
- Edited and refined video content in Adobe Premiere Pro, covering colour grading, audio clean-up, and pacing to maintain audience engagement.
- Designed high-CTR YouTube thumbnails, improving organic click-through rates.
- Managed daily content publishing and community engagement across Instagram, Facebook, and YouTube.

Marketplace Ads Specialist <i>Evergreen Furniture Canada</i>	Jan 2024 – Mar 2024 Remote
--	-------------------------------

- Planned and executed geo-targeted ad campaigns to attract qualified local buyers in the Montreal region, optimising for cost-per-lead.
- Wrote compelling ad copy and managed inbound customer inquiries, converting leads into confirmed buyers.

- Monitored campaign performance metrics and iterated on creatives to improve overall return on ad spend.

E-Commerce Entrepreneur *Self-Managed Online Store*

Ongoing
Remote

- Built and managed a self-run online store, currently generating over **PKR 10 lakh+ per month** in sales through strategic product selection and targeted digital marketing.
- Ran paid advertising campaigns via Meta Ads Manager to maximise product reach and drive consistent revenue growth.
- Handled end-to-end operations including inventory management, customer service, and order fulfilment.

ACADEMIC PROJECTS

Cinema Management System | *C++, Object-Oriented Programming*

- Developed a command-line cinema management system in C++ as a 1st semester university project, applying OOP principles (classes, inheritance, encapsulation) to model real-world ticket booking and seat allocation logic.
- Implemented features for movie scheduling, seat availability checks, and automated billing for ticket reservations.

Smart Parking Management System | *C++, Object-Oriented Programming*

- Developed a command-line parking management system as a 2nd semester university project, applying core OOP principles (classes, inheritance, encapsulation) to model real-world slot allocation and billing logic.
- Implemented features for vehicle entry/exit tracking, slot availability checks, and automated fee calculation.

PROJECTS

Web Development | *HTML5, CSS3, JavaScript, GitHub Pages*

- Designed and developed romicmedia.com, a full-service digital agency website, covering navigation, service listings, blog, and a contact system integrated via EmailJS; resolved SEO/search-index issues and deployed it independently.
- Designed and deployed a personal portfolio website at alistackdev.github.io, crafting a custom, responsive web design from scratch using HTML, CSS, and JavaScript.

TECHNICAL SKILLS

Web Development: HTML5, CSS3, JavaScript, Responsive Design, GitHub Pages

Backend & AI Integration: Node.js, REST APIs, Retrieval-Augmented Generation (RAG), Grok AI, Google Docs/Sheets API, Zoho SalesIQ API, Nodemailer

Digital Marketing: Meta Ads Manager, Lead Generation, Email Marketing, Content Strategy

Content & Media: Adobe Premiere Pro, InVideo AI, ElevenLabs, Graphic Design, Thumbnail Design

E-Commerce: Store Management, Product Sourcing, Order Fulfilment, Meta Paid Advertising

Tools & Platforms: Git, GitHub, Canva, Microsoft Office

ACHIEVEMENTS & AWARDS

- **PKR 10 Lakh+ Monthly E-Commerce Revenue:** Independently built and scaled an online store to over PKR 10 lakh in sales per month through targeted digital marketing.
- **End-to-End Project Ownership:** Independently designed, developed, and deployed three live projects – two websites and a production AI automation system – without external support.
